Key Advantages of LIDAR LIDAR - Light Detection and Ranging

- Reduce on-site time and cost of traditional terrain data collection
- Vegetation penetration and isolation of ground layer
- More accurate surface models
- Direct Geopositioning and Ground Control Point tie-in (Per Client Request)
- Streamlined workflow
- Multiple data file formats
- 3D colorized point clouds
- Topographic mapping
- Volumetrics and area calculation
- Orthomosaic mapping
- CAD deliverable capabilities
- Web based deliverables
